RAKESH MAMINDLA

Hyderabad, India | +91 9346584513 | mamindlarakesh124@gmail.com

OBJECTIVE

Java full-stack developer (B.Tech CSE, 2026 graduate) currently training in Core Java and Advanced Java through a hands-on trainee program, building real projects alongside the coursework. Comfortable across the full stack including HTML/CSS/JavaScript, Spring Boot/Spring MVC, and MySQL. Actively learning and looking for a Java Developer role to apply and grow core backend engineering skills.

TECHNICAL SKILLS

- Languages: Java, JavaScript
- Java Web Technologies: Servlets, JSP, Spring Boot, Spring MVC, Spring Security, Apache Tomcat
- Frontend: HTML5, CSS3, React
- Databases: MySQL, Oracle
- Tools & Version Control: Eclipse, VS Code, Git, GitHub

PROJECTS

Library Management System – Console-Based Java Application *Mar 2025*

Core Java | OOP, Collections Framework, File Handling

- Built a console-based library management system in core Java, applying OOP principles (classes, inheritance, encapsulation) to model books, members, and issue/return transactions.
- Used the Collections framework (ArrayList, HashMap) to manage book inventory in memory, enabling fast search, availability checks, and due-date tracking for issued books.
- Added file handling to persist book and member records between runs, so data isn't lost when the program restarts.

Expense Tracker – Full-Stack Web Application *Jul 2025*

Java Full Stack | Spring Boot, MySQL, HTML/CSS/JavaScript

- Built a full-stack expense tracking application using Spring Boot and MySQL, letting users add, edit, and delete daily expenses under categories like food, travel, and bills.
- Designed a dashboard showing total spend and category-wise breakdown for the month, using simple aggregation queries.
- Built REST APIs in Spring Boot to handle CRUD operations for expenses, connected to a HTML/CSS/JavaScript frontend.

EXPERIENCE

Codegnan IT Solutions — Java Full Stack Trainee (In-person) *Jun 2026 – Present*

- Undergoing hands-on training in Core Java and Advanced Java, along with full-stack web development (Spring Boot/Spring MVC, MySQL, HTML/CSS/JavaScript).
- Building projects alongside the training curriculum to apply Java concepts, object-oriented design, and database integration in practical scenarios.
- Actively learning industry-standard development practices, coding standards, and version control workflows in a structured, in-person training environment.

EDUCATION

Balaji Institute of Technology and Science, Warangal *Nov 2022 – 2026*

- B.Tech in Computer Science Engineering

CERTIFICATIONS

- Programming in Java — NPTEL
- Python Essentials — Cisco
